

# It's Finally Here!

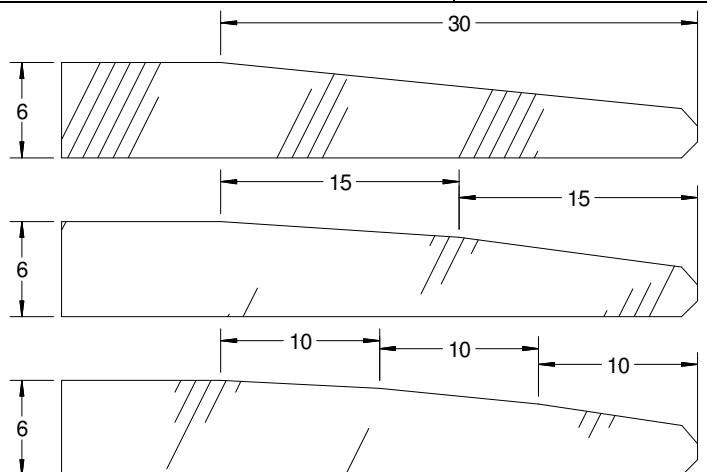

**Bottero**  
Glass Technologies

At Logan Glass we are now offering the latest advances in beveling with our new computer controlled multi angle technology. We can now offer you more options with improved quality.

Thickness	4mm to 12mm
(Greater thicknesses are available POA)	
Bevel Angle	3° to 30°
Maximum Bevel Width	50mm
Minimum Glass Size	100 x 100

With the ability to now produce single, double and even triple bevels, you can combine the brilliance of a full polish with the feature of a flat grind to give your customer a greater range of mirrors and tabletops.
